PRESENTACIÓN

La Comunidad Lingüística Mam de la Academia de Las Lenguas Mayas de Guatemala, pone a disposición el libro " NUMERACIÓN MAYA MAM" a los docentes, a la juventud, a la niñez y a todas las personas interesadas en el desarrollo y reivindicación de la cultura del pueblo Mam.

Este libro contiene el Sistema de Conteo de forma sumativa, su escritura según la numeración maya de cero a setenta y siete mil ochocientos veinticuatro billones, ciento cincuenta y nueve mil novecientos noventa y una breve explicación sobre la base vigesimal de la cual se desprenden todas las cantidades y posiciones del sistema vigesimal de numeración.

El libro ha sido elaborado con el propósito de ampliar el uso del Sistema de Conteo de nuestros abuelos y abuelas para que la nueva generación lo utilice y lo practique en cualquier circunstancia de su vida cotidiana.

INTRODUCCIÓN

En el transcurrir del tiempo y espacio se mantiene vivo el reflejo de los conocimientos de nuestras abuelas y abuelos con relación al sistema de Numeración Maya de base veinte.

El sistema de numeración Maya, es entonces uno de los más grandes adelantos en la humanidad incluyendo la invención del cero; tal descubrimiento propició el avance de las ciencias y otras ramas del conocimiento que en la actualidad podemos apreciar en admirables obras de arquitectura y en resultados de cálculos astronómicos grabados en piedras y escritos en los únicos códices denominados Dresden, de Madrid y de París. Resulta asombroso pensar que mientras en Europa se acabó de generalizar el uso del cero hasta el siglo XV; 1,800 años antes los mayas ya tenían la ventaja de este elemento en sus cálculos. Lo cierto es que los mayas ya contaban con un sistema de numeración perfecto, posicional y con el elmento cero, 300 años a. d J.C. casi 1,000 años antes de la invención del cero en la India.

La matemática maya se fundamenta en el sistema Winaq (diez dedos de las manos y diez dedos de los pies) de la persona (winaq), es decir, de base veinte y de estructura posicional.

En el sistema de numeración Maya Mam se utilizan únicamente tres símbolos: El caracol que representa el cero ( ), el cero en la cultura Mam representa el inicio y el fin, en donde nace y sale la semilla; el punto que representa el uno (·), a su vez un grano de maíz y la barra que representa el cinco (—), a su vez un brazo compuesto por cinco dedos o un pie.
En el caso del cero, se puede escribir en cualquiera de las posiciones, indicando la ausencia de cantidad en esa posición. El punto se puede escribir en cualquiera de las posiciones, solamente por cuatro veces en un mismo nivel de orden, cinco puntos se transforman en una barra. La barra solamente es posible escribirla tres veces en un mismo nivel de orden, cuatro barras se transforman en un punto en la posición inmediata superior.

El sistema de numeración basado en los puntos, barras y cero, se presta admirablemente para efectuar cálculos con gran rapidez.
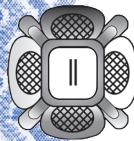

La matemática maya es una ciencia profunda y vasta; a través de su aprendizaje se desarrolla el pensamiento lógico, las habilidades y destrezas cognitivas de las niñas y los niños. La enseñanza de la matemática maya se enmarca en el entorno natural, social y comunitario; y sigue los procesos metodológicos del conocimiento matemático maya: la observación, comparación y abstracción de los objetos o elementos de la naturaleza.

En este material va escrita la propuesta de la continuación de la escritura del sistema de conteo en forma sumativa; por las razones siguientes:

- Corresponde exactamente a la forma escrita en las estelas mayas y en los kumatzim Wuj, conocidos como códices Mayas.

•• Sistema utilizado por nuestros antepasados cuando escribieron cantidades grandes, principalmente para la astronomía.

••• Es fácil realizar las cuentas, en contraposición al sistema sustractivo; según los didáctas e investigadores del sistema de contar.

BASE DE LA NUMERACIÓN MAYA

El sistema de numeración maya tiene un profundo sentido filosófico, ya que es cosmogónico por su relación hombre y naturaleza.

El valor relativo de los números, se refiere a que adquiere la cantidad dependiendo en qué posición esté ubicado el símbolo.

El punto en la primera posición toma el valor de uno (1); en la segunda posición veinte (20), en la tercera posición cuatrocientos (400), en la cuarta posición ocho mil (8,000) y así sucesivamente hasta llegar a la décima segunda posición.

Nivel	Término maya	Significado	Puntos	Valor relativo del punto	Cantidad en arábigo
20^{12}	Ku	Alma, corazón	·	Junku	4,096,000,000,000,000
20^{11}	Nitx'	Célula	·	Junnitx'	204,800,000,000,000
20^{10}	Xmu's	Llovizna	·	Junxmu's	10,240,000,000,000
20^{9}	K'ul	Monte	·	Junk'ul	512,000,000,000
20^{8}	Tzab'	Pléyades	·	Juntzab'	25,600,000,000
20^{7}	Jb'al	Lluvia	·	Junjb'al	1,280,000,000

20^{2}	Q'o'	Ayote	·	Junq'o'	400
20^{1}	K'al	Manojo	·	Junk'al	20
20^{0}	Jun	Uno	·	Jun	1

La barra en la primera posición toma el valor de cinco (5), en la segunda posición cien (100), en la tercera posición dos mil (2,000), en la cuarta posición cuarenta mil (40,000) y así sucesivamente hasta llegar a la décima segunda posición. El valor relativo se va obteniendo multiplicando el valor de cada posición por el número.

Nivel	Término maya	Significado	Barras	Valor relativo de la barra	Cantidad en arábigo

«En la práctica diaria, el cero se representa por medio de semillas de ayote o mucún. Una de las características del cero (⌬) es ser centro, al confrontar este concepto al concepto madre, se constituye como un concepto central y muy amplio, que rebasa el sentido de progenitora»[1]

Tk'u'j tqan	Twi' tk'u'j	Ttzi tk'u'j
Tk'u'j witz	Ttxu tk'u'j	Tun tk'u'j
Tk'u'jb'il	Toj tk'u'j	Ttxa'n tk'uj

El cero en la escala numérica representa ausencia de cantidad y se puede escribir en cualquiera de las posiciones.
